EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Steven B. Chang on 8/27/10.

The application has been amended as follows:

Claim 1 is amended to read:

A microreactor for producing hydrogen by reforming a feed material, comprising:
a joined body including a first substrate and a second substrate that are joined together;

a flow path formed by a microchannel portion formed on a joining surface of at least one of said first or second substrates; and

a catalyst carrying member disposed in said flow path and including a reforming catalyst,

wherein said reforming catalyst is supported independent of wall surfaces of said microchannel portion that define said flow path so as to be suspended in the microchannel portion, free of contact with the wall surfaces,

wherein the catalyst carrying member is wire shaped, and

wherein said wall surfaces of said microchannel portion that define said flow path are free of any film or catalyst.

Claim 2 is amended to read:

A microreactor according to claim 1, wherein said catalyst carrying member comprises a metal base body, a metal oxide film covering said metal base body, and said reforming catalyst supported on said metal oxide film.

Claim 7 is amended to read:

A microreactor according to claim 1, wherein said catalyst carrying member comprises an electric heater, a metal oxide film covering said electric heater, and [[a]] said reforming catalyst supported on said metal oxide film.

Claim 9 is amended to read:

A microreactor according to claim 1, wherein said catalyst carrying member comprises an electric heater, a metal film covering said electric heater, a metal oxide film covering said metal film, and said reforming catalyst supported on said metal oxide film.

Claim 31 is amended to read:

A microreactor for producing hydrogen by reforming a feed material, comprising:

a joined body including a first substrate and a second substrate that are joined together;

a flow path formed by a microchannel portion formed on a joining surface of at least one of said first or second substrates;

a catalyst carrying member disposed in said flow path and including a reforming catalyst, said reforming catalyst is supported independent of wall surfaces of said microchannel portion that define said flow path so as to be suspended in the microchannel portion, free of contact with the wall surfaces;

wherein said catalyst carrying member comprises a metal base body, a metal oxide film covering said metal base body, and said catalyst supported on said metal oxide film,

wherein said metal body includes a wavelike plate shape in section, and

wherein ~~both end openings of said flow path are exposed at a first end surface of said joined body~~ said wall surfaces of said microchannel portion that define said flow path are free from any film or catalyst.

2. The following is an examiner's statement of reasons for allowance: While the closest available prior art—the Kawamura (US 2004/0025784) references—discloses a wire-shaped catalyst member free of direct support with the channel walls, Kawamura does not disclose the channel walls to be free of any film or catalyst nor does Kawamura suggest a catalyst member suspended in the channel walls such that the catalyst member is free of contact with the channel walls. The Towe (US 2004/0258587

A1) reference discloses possible catalyst structures (see figure 3) but include a catalyst member free of wall contact, but does not provide motivation to modify Kawamura or any other prior art of the record to free the walls of any catalyst or film. These features, in combination with what else is claimed, are novel and nonobvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to IMRAN AKRAM whose telephone number is (571)270-3241. The examiner can normally be reached on 10-7 Monday through Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Alexa Neckel can be reached on 571-272-1446. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
